Inleiding

A new Self Service experience

The Self Service Station provides your library with a new self-service experience. It contains a barcode, Mifare or RFID reader to identify the user, an RFID reader for the check-in/out process and a touch screen for user interaction. Additionally, the Self Service Station contains a printer for the receipts.

Check-in and check-out

The Self Service Station can function as a check-in, check-out or combi station. This way you can facilitate the whole lend and return process with just one desk. The Flexdesk is equipped with a table-top reader. The reader is produced in such a way that only items that are on top of the antenna are processed.

User friendly

Because of the use of touch screens and user-friendly software, the Self Service Station can easily be used by all ages. It enables the user to lend out and return books by completing a few simple steps.

Meeting your demands

The Self Service Station can be delivered in several colours and shapes, to meet your specific demands.

Benefits

- Check-in / Check-out or combined
- Simple user interface
- Several color and appearance options
- Robust; use of industrial electronics
- Remote service and support
